

EMERGENCY KIT

These are guidelines as to what you should have in a survival kit. Evaluate your situation and customise your survival kit to serve your needs in any emergency situation, not just wildfires. There are some blank spaces for you to add in reminders for any other personal items you may require.

HINTS

- Practise packing your car so you know how long it will take.
- Know your escape route and backup options if primary route cut off.
- Talk to neighbours or nearby friends about how you might help each other.

ITEM	Y/N
Water (5 Litres per person, per day).	
Food (3 days supply of nonperishable food to suit your family needs).	
Phone + charger.	
Torches (one per person + spare batteries).
